Weekly Journal for Breadstuffs Managers

1983 MILLING DIRECTORY/BUYER'S GUIDE

This 1983 Milling Directory/Buyer's Guide comprises two sections. The first is a continuation of the Directory of Milling which had its beginnings more than half a century ago and has been published by *Milling & Baking News* since 1973. The second is a Buyer's Guide of milling equipment and services, first published as a separate directory by *Milling & Baking News* in 1978.

The Milling Directory provides a comprehensive list of companies and products in the milling industry, including daily flour milling and storage capacity, railroad service, executives in management and production, and wholesale and retail brands. The 1983 Milling Directory also includes, for the first time, information on specialty flour mills on Page 71. The statistical summaries beginning on Page 6 detail milling capacity by largest companies, by states and by type of flour. An alphabetical list of milling companies begins on Page 79.

The Buyer's Guide includes a complete list of products and services for milling and an alphabetical list of companies producing and/or supplying these products. Suggestions on how to use the Buyer's Guide appear on Page 85.

TABLE OF CONTENTS

MILLING DIRECTORY

UNITED STATES:

Statistical summaries	6
Multiple unit companies	13
Wheat flour mills	27
Family flour packaging plants	48
Mix manufacturing plants	53

BUYER'S GUIDE

Introduction/Index	85-86
Products/Services	87
Manufacturers/Suppliers	104
Index to Advertisers	119

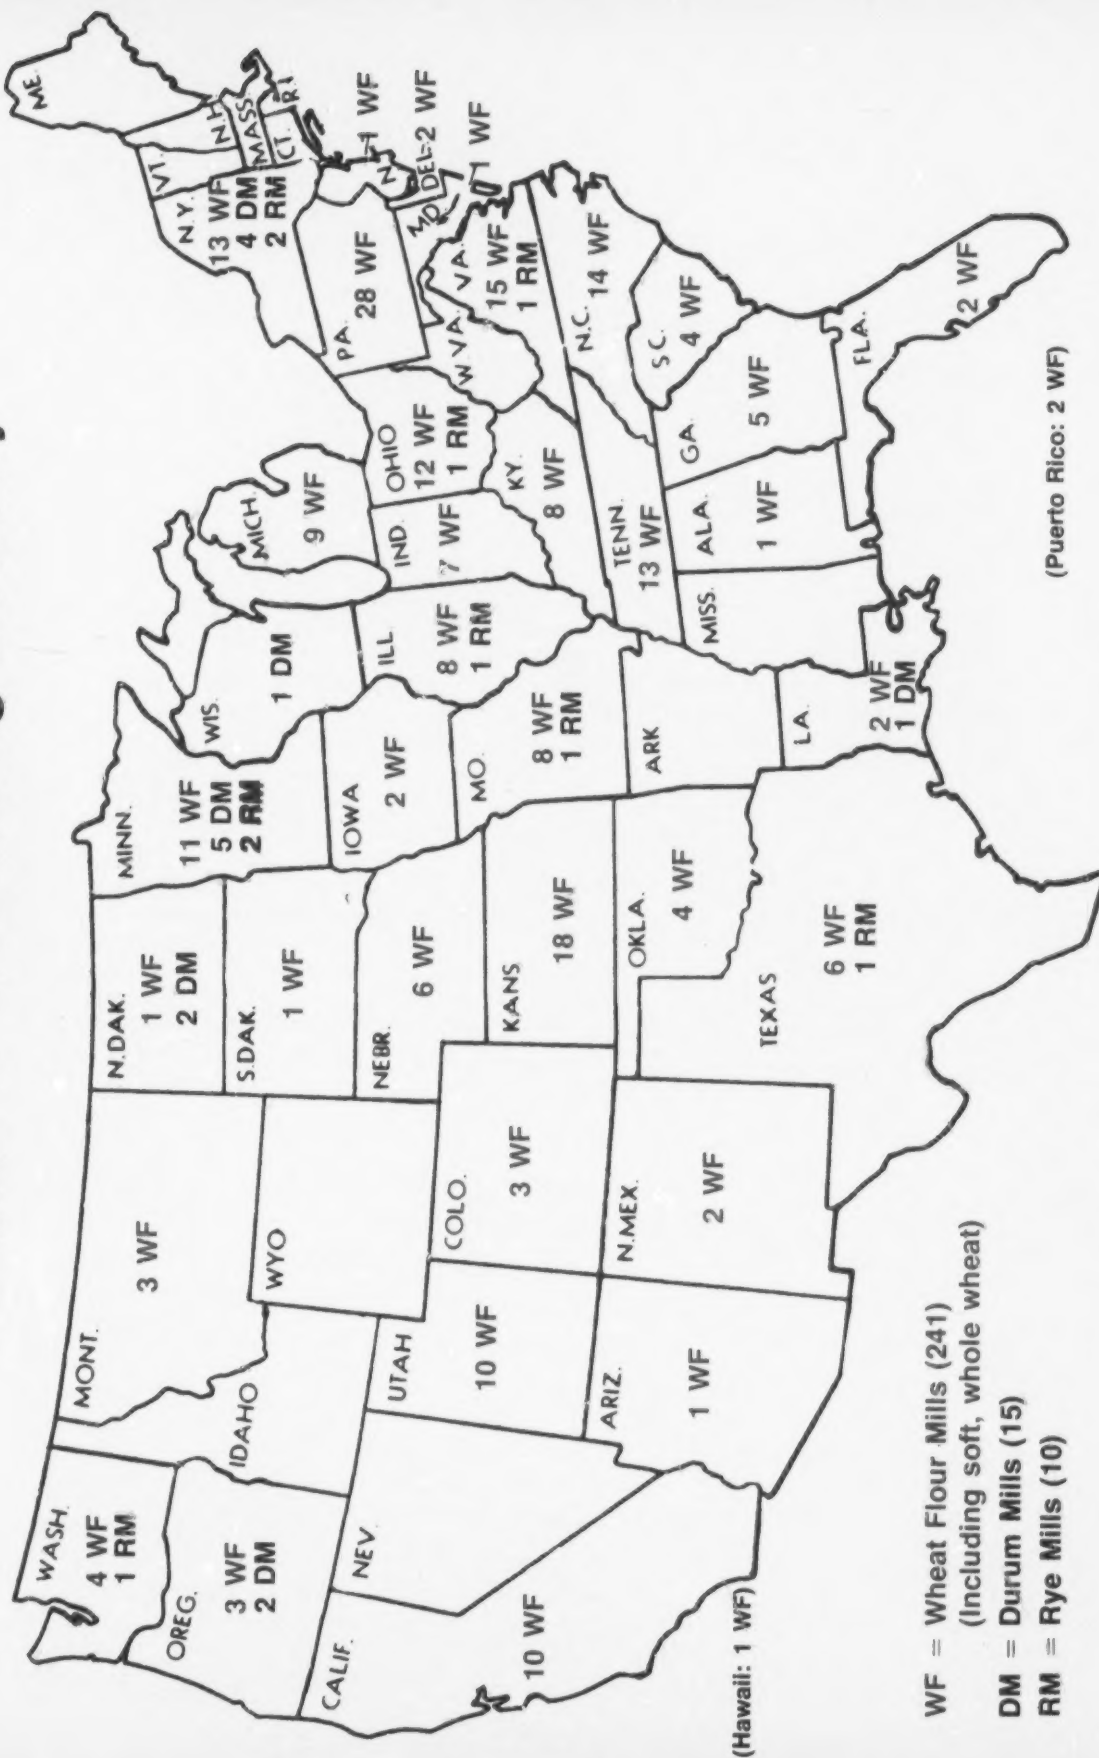

This Milling Directory/Buyer's Guide is unique in that each listing is verified by the companies listed for accuracy. Every effort has been made to present a publication free of errors and/or omissions. In the event that errors or omissions occur, the editors of *Milling & Baking News* would greatly appreciate communications to that effect so that corrections will be made in future editions.

*Soft wheat flour; **whole wheat flour. (Capacity alternates, generally, with other milling capacity.)

(1) Does not include 5,000 cwts wheat flour, alternating with 3,000 cwts durum, under construction at Phoenix, Arizona; and 5,000 cwts wheat flour under construction at Oakland, California.

(2) Includes Centennial Mills Division; 4,200 cwts of durum capacity alternates with wheat flour.

(3) Does not include 6,000 cwts wheat flour under construction at Los Angeles, California.

(4) Does not include 1,750 cwts rye flour under construction at New Prague, Minnesota.

To Help You Make The RIGHT DECISION

Proper planning and knowing when to make the right move are mighty important in the game of chess. But in the world of business . . . whether the move involves an acquisition or a spin-off, a capital expansion or maximizing the cash flow of an investment . . . each decision must be backed by a reliable appraisal.

Such an appraisal can best be supplied by a full-service company with broad experience in the application of sound, creative valuation techniques. Patchin Appraisals is that kind of company: one that has served America's agribusiness since 1952. And we will welcome the opportunity to put our experience to work . . . to help you make the right decision.

George L. Patchin

We're #1.

Burlington Northern
is America's
number 1 grain hauler.

A NEW CENTURY OF QUALITY

It's trite but true that experience is the best teacher. In our first one hundred years of flour milling, we know that we've learned a lot.

We produce soft wheat flour—for cakes, cookies, crackers, pretzels, batter, and breadings.

We believe that our products, including New Century Hi Ratio Cake Flour and Gold Standard Cookie and Pastry Flour, adhere to a standard of quality that should be every miller's goal.

When consistent product and reliable service are important to you, think of us. We've learned what it takes to keep our customers satisfied. . . and we're doing better every day.

HUMPHREY EMPLOYEES' BELT MANLIFTS

Production goes up when a Humphrey Employees' Belt Manlift goes in. You save man-hours by eliminating stair-climbing time and fatigue. A Humphrey Manlift provides simultaneous up and down transportation, eliminates waiting and delays. It costs less to install and maintain than conventional elevators and takes only a fraction of the space.

Important SAFETY FEATURES of the HUMPHREY EMPLOYEES' MANLIFT

1. Roller limit switch safety stop device automatically stops manlift if rider forgets to get off on top floor. Tripped by weight of person on step.

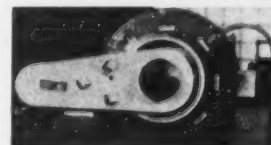

2. Overhead limit switch safety stop device. If tubular bar is bumped by rider, limit switch is activated to apply brake and stop manlift instantly, preventing rider from going over the top.

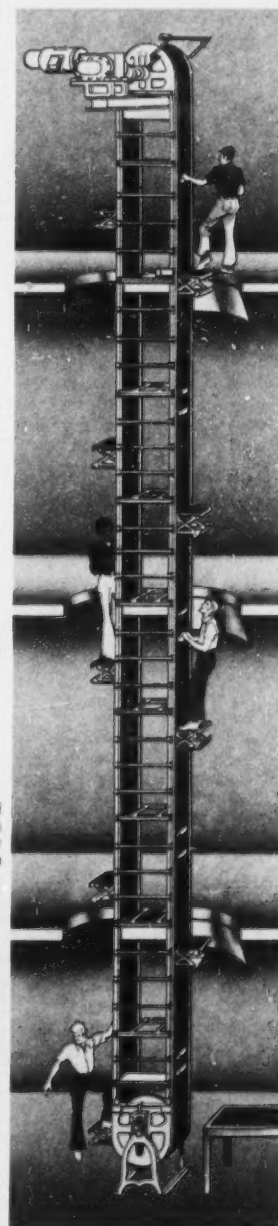

3. Foot treadle limit switch safety stop device automatically stops manlift if rider fails to get off at bottom landing.

4. Optional movable safety cone hood for mounting beneath floor openings on up travel side of manlift. If bumped by rider, mercury switch is activated to apply brake and stop manlift instantly.

5. New electronically-actuated "Saf-T-Stop" brake stops overspeed in normal direction of travel. Proven roller holdback device prevents reverse travel. Greater safety than ever with this combination. Brake and holdback are extra-cost options, except where required by state code. Available for all new Humphrey belt manlifts and most existing Humphrey and Allis-Chalmers' Nordyke & Marmon manlifts.

Send now for quotation on your requirements.
Or telephone (507) 334-6193.

HUMPHREY ELEVATOR and TRUCK CO.

700 CANNON LAKE DRIVE • FARIBAULT, MINN. 55021 • CABLE: HUMELEV

Manufacturer of the original employees' belt manlift, made continuously since 1887

How low is low a farmer said as he put his plow to bed.

We have too much of this or that it is a crutch to hide our fat.

The Russians need the Chinese crave our grain for feed why should we save?

Our rainy day may never come but if it may we'll have some.

So ship it out and raise the price we have the clout and money's nice.

It makes no sense to pile it high at great expense while farmers die.

U.S. Multiple Mills...

KNAPPEN know-how.

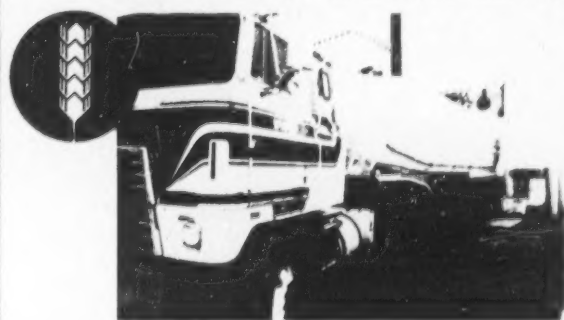

When quality counts.

At Knappen Milling Company quality control is essential. Experienced technicians continuously conduct tests to assure uniform grain/flour specifications. A sealed pneumatic system moves the grain and flour throughout the mill and bulk flour terminal. We maintain constant temperature and humidity levels to assure a superior finished product.

Looking for a quality-conscious, dependable milling company? Call Knappen. We have over 50 years of know-how. For our capabilities brochure, call or write:

Knappen Milling Company
Augusta, Michigan 49012
(616) 731-4141

KNAPPEN know-how.

When dependability counts.

At Knappen we know what dependability means to you. That's why we consider ourselves to be in two businesses. The milling business. And the transportation business. So we strive to give you the highest quality soft wheat flour. And dependable deliverability to boot.

We maintain a fleet of trucks and railroad cars to assure prompt delivery of all our products. Need it fast at an economical price? Call Knappen. We have over 50 years of know-how. For our capabilities brochure, call or write:

Save Money! Improve Operations!

Come To The Sampling Professionals.

A Gustafson automatic sampler can give you a 100% Return-On-Investment within days or weeks. Savings can accrue due to reduced labor, greater efficiency in the lab, reduction of production losses and elimination of rejected shipments.

Since the lab data is only as good as the sample received, a Gustafson automatic sampler can help you protect your investment in lab equipment and personnel.

Gustafson represents the Standard of Quality in automatic sampling equipment because we offer you four important product advantages. You are assured of custom engineering design for your exact needs, quality construction of stainless steel with other materials optional, application experience within the milling and baking industry, and service before and after the sale.

By saving money and improving operations, think what a Gustafson sampling system can mean to your profits.

WHAT MAKES A GREAT MILL TODAY.

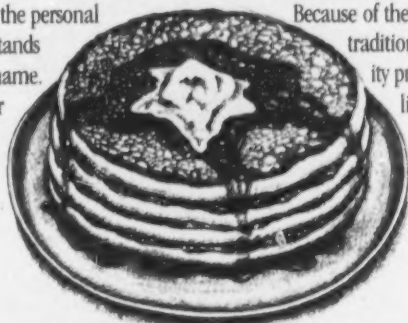

When Alliance Milling became The Morrison Milling Company in 1936, a prize-winning flour mill was transformed into a going, growing business. Three generations of Morrisons later, our family still guards the old-fashioned quality and superiority of products that bear our Morrison labels. And never forgets the personal service that stands behind our name.

Today, our "family"

includes Hill, Hughes, Marlow, Wallgren and others, along with Morrison. They're industry leaders, with decades of experience in milling production, marketing, distribution and sales, some of the best in the business.

We're proud of the people behind our Morrison family name.

Because of them, our tradition of quality products lives on.

Dust-Sorb®

suppresses grain dust.

Dust-Sorb is:

- A patented product for dust suppression.
- More economical than mechanical methods.
- Applied to moving streams of grain on the way to storage.
- Applied by application equipment that is simple, inexpensive and energy efficient.
- A product that simultaneously provides a practical solution for most problems resulting from grain dust emissions and offers no known negative factors.
